LAND MOBILE
MOUNT ADAPTER

The Adjustable Mount Adapter, standard with all Land Fixed models (OW10HL and OW11FL), is compatible with Quadpod, Non-Penetrating and TriMast Mounts. This mount adapter is compatible with any 60mm diameter pole, offering flexibility, and includes a built-in leveling tool for quick, precise adjustments.

The Quadpod Mount is Intellian’s solution for quick and sturdy installations, ranging from short-term COTP applications to permanent land-fixed installations.

The Non-Pen Mount is the ideal solution for installations where a base fastener may not be feasible. Secured in place with cinder blocks, the Non-Pen Mount ensures your flat panel is secure without disrupting the surface of a flat roof or even an open field.

The Maritime Mount Adapter is designed to accommodate a variety of maritime mounting needs. It supports pedestal and mast mounts directly. This versatile plate provides a reliable and stable platform in demanding marine environments.

The Maritime Pole Mount Adapter is designed specifically for secured pole installations in demanding maritime environments. Supporting standard 60 mm pole mounts, it is optimized for both the Compact and Enterprise Flat Panel Series. With a simple bolt-fastened design, this mount ensures a reliable and stable platform.

The Land Mobile Mount Adapter is optimized for quick and efficient vehicle installations, while supporting all major vehicle crossbar systems. Compatible with both the Compact and Enterprise series, this mount adapter will secure your antenna for the roughest of land mobile terrains.

Intellian

MOUNT PORTFOLIO

Intellian provides a range of mounting options designed to meet diverse market needs, guaranteeing safe and stable operation in various environments, from harsh maritime conditions to a variety of land-based operations.

Whether for land fixed, maritime, or land mobile applications, Intellian's mounting solutions can secure user terminals effectively. Customers can select the ideal solution to enhance the reliability and durability of their equipment, facilitating uninterrupted functionality and superior service.

Intellian designs and tests mounts to incredibly rigorous standards such as IEC 60945 for maritime and IEC 60068 for land mobile for a full range of use cases.
